

Memo from
JOSHUA LEDERBERG

To: Sam Proxmire

DEC 26 1972

B52's and the B-1

I find it hard to judge whether the USAF is undercutting its case for the B-1, or making this obligatory by reducing its inventory ^{of B52's}. Have you looked into the military justification of using SAC forces for a tactical mission? (Not to mention all the other considerations.)

Yours
(but please do not attribute)
