Telephone call from Dr. Raub's office NIH, Bethesda, Md. 5/5/71

"By late Friday Dr. Raub would appreciate having the names of a few respected geneticists who

- a) are likely to be familiar with the transplantation immunology work of Paul Terasaki, UCLA, and the current state of knowledge about the associated genetic mechanism
- b) might be amiable to participating as an NIH consultant in a small informal ~~group~~ NIH assembled discussion group which is to meet at UCLA in mid-June."
