Dear Josh:

I am enclosing copies of Volumes I and II of the conferences on Research in Psychotherapy. I am pleased to be able to send these to you, especially since I had something to do with the first of this series. I would especially commend to your reading in Volume I the chapter by John Lacey on psychophysiological approaches. I believe even now, ten years later, it remains a landmark interpretation of this area.

Turning again to the discussion we had at your house some weeks ago, I hope to be able to contact you sometime soon to discuss possible next steps in trying to develop an informal locally based group concerned with long-range programmatic developments in the behavioral sciences. This is something I believe both you and Dave Hamburg would be interested in pursuing.

Cordially,

Eli A. Rubinstein, Ph.D.  
Assistant Director for  
Extramural Programs and  
Behavioral Sciences
