RO

To yours of 7/10.

Thank you for this amplification. It was when I found that I could not convey my thinking effectively via even the best science news men that I decided to write on my own-- and even then....

This note gives me an opportunity to express my gratitude for a ~~mm~~ debt I have never known how to repay. The Cooper Union library was a vital source of my own education, when I was a student at Stuyvesant H.S (1938-41). I have a very happy recollection of having been treated with the utmost consideration when I was devouring the contents of its stacks, learning chemistry and mathematics on my own schedule -- and when I might well have been rebuffed or ignored, as often happened at other institutions.

Yours sincerely,

A.S. of Kneese.
