Memo from
JOSHUA LEDERBERG

To

Kees

10/11/72

00.25.72

I am trying to trace the first
credible or insightful experiments
on "interclonal influences" in
bacteria. Sauspice 1893
and Smith, Th. 1894 (Trans.
Am. Assoc. Physic. 9:85) who
quotations are the earliest I have.
Do you have any other suggestions?

Do you know of any later workers
who would have cited either
of these (before 1954)?

Josh
