Dr. J. Lederberg
Genetics Department
Stanford University
Stanford, California

Dear Dr. Lederberg:

* Thank you for your note of December 15. Most of the articles discussing "zero tolerance" or indeed dose response studies with carcinogens are listed as references in our paper. There is no more published so far as we can tell. We would be glad to have additional references if you should run into some yourself.

I do know that a number of unpublished studies deal with dose response with carcinogens. Hopefully they will see the open literature soon.

I have inquired with our chemotherapy people on aramite. I will let you know whatever information develops.

Best wishes for the New Year.

Sincerely yours,

John H. Weisburger, Ph.D.
Head, Carcinogen Screening Section
Biology Branch, Etiology
National Cancer Institute

J. H. WEISBURGER
