WAR DEPARTMENT,

SURGEON GENERAL'S OFFICE,

Washington, D. C., November 17, 1884.

The photographs herewith submitted are intended to indicate some of the older and rarer books in the Library of the Surgeon General's Office, and, in connection with the Catalogue of the Library, to give an idea of what has been accomplished in the attempt made by this office to form a collection of medical literature which should meet the demands of the physicians of the United States.

These photographs were prepared at the Army Medical Museum, and may be considered as very successful. It must be remembered that many of the books are yellow with age, and that all yellow spots or stains appear in the photographs as dark or black spots.

The photographs are arranged in three series: the first containing early foreign prints; the second, early and rare American prints; and the third, a series of early or rare American prints on the Small Pox and Inoculation.

By ORDER OF THE SURGEON GENERAL:

J. S. BILLINGS,

Surgeon U. S. Army, Curator Army Medical Museum.

Oyeue couenable and true medicine a good Philicion nedeth to loke well aboute/and be full ware and full well aduised. For nothynge letteth more helthe of lyke men, than vncunning a negligence of philiciens. On the philiciens lide, it ne beth that he forgete no thynge that longeth to the euyll. Also that he be byly. gent and befye in thinges that longen to the crafte of medycyne: And he muste be-ware and auysed in all thynges. Also to beele and faue effectuelly, hym nedeth to knowe and to ynderstonde the complexyons of men, composicions / myxcyons, and medlynges / bothe of the humours and of the membres, and to vuderstonde. and knowe the disposycyons of tymes the condicions of the male and female, and aege. for one maner medycyne ne. beth in wynter, and a nother in somer: And one maner in the begynnynge of the eugli, and a nother in the full, and a no-ther in passing therof: One in childhode, Tin youth, an other in ful age/a nother in olde age:one inthe males zan other infemales. And him nedeth to know causes ? occasione of euyls/ tokens, fygnes, and accidentes of all maner eugle . For medicine may neuer be fikerly take if the caufe of the euglis vnknowe. Also hym nedeth to know coplexions vertu a werking of medicinable thinges . For but he knowe what medicine is symple/what compow

ned, what colde, and what hotte, what werketh and amendeth the bodye what kepeth heale, What healeth fykeneffes, What hardeth and confreyneth / what neifheth and lexeth: De maye neuer fy kerly passe forth and worke in medicine. Alfo therfore it nedeth to knowe the qua litees of herbes t of other medycynable thynges, and discrittee of degrees, what is hote and orie, what is colde a moifte, in what ocgree, if he woll not erre in his office. And therfore him nedeth to knowe the durynge contrarynesse, simplenesse, quantite, and qualite of the pacient/and his vertue and itrengthe , and febleneffe. for a chaunginge cuyll, that is longe en-burynge, nedeth fronger medicine, than an enyl that is newe, and hath not longe endured. Alfo a simple euyl malbe heelid with a symple medicine: and an enyll that is compowned of contraries shall be heeled with compounid medicines. for selde a symple medycyne heelytha fikenes, that is compowned. Also ayenst an hote cause nedeth a colde medycyne: and ayenfte a colde nedeth an hote medicyne: and ayenfte a medlyd caufe nedeth a medlyd medicine. And therfore a leche and philicien, that is wife and ware, and knoweth the enyll, tempereth the qualyte, as the quantite z qualite of the cuyl areth. Also whan he feeth that the ivel cometh of replecion, he helpeth it by voi bynge of the matter, and by scarle byete. and if it cometh of abstinence, he heleth it with replecio. Also the office of a good philyeyen stondeth in inquisicion and fer chynge of the causes & cyzcumstaunces of the euyll. For he fercheth and fecheth the cause by syghte, by handlynge and gropynge, by vryne, and by the pulfe: Whan the cause is knowen, if the mater be hidde depe within, than he vieth dias wynge medycynes. And if the matter be in the forepartyes, and withoute, he laboureth to drawe the matter to the ftomake, that he maye the easelyer bringe it thens . And if the matter be harde and sadde le youeth medycynes that bear leth and oiftrybutcth , and al to kytteth,
