(March '89)

Dear O.

Very glad of yours this A. M. particularly about poor Friend, as I am very much interested in his condition on account of a young lady to whom he became much attached & who I fear rather encouraged him. She is abroad with her mother & I was consulted by them about his mental state. I fear from H. C. Wood's account that he is a hopeless paranoic. It seems very sad.

Mrs. F. is now at 482 Ontario St. All are well. May had a mild typhoid & is now quite well. I saw them a few weeks ago when I was in T. at a wedding of a niece. I go to B. in May. We are getting the Hosp in order. If you know of any A.A.M. copper-bottomed young graduate in the West who could serve for a year as Interne I should like one. He must come with your entire approbation. I shall take LaFleur from Montreal as my Chef de Clinique in charge of the Clin. Lab. & general supervisor of the ward work. We shall need 2 - 5 resident graduates - ultimately 10 - 20 & they are to be selected from the country at large. Glad the Vol was of use. Come East soon. I saw a patient of yours Geo. B. Miller, slight alb. nervous. &c, & his right kidney wobbles about in an uncomfortable way - & I dare say upsets him. He thinks very much of you & I did not undeceive him.

Ever yours,

W. Osler.
