8th Oct?  
Nov? Dec?  
1908

Dear Jacobs

I have not been able  
to find Xemenus address - he is  
not in the directory - but this  
afternoon, an artist friend, said  
he thought he could find him  
Sorry for the delay. We are very  
busy - something fresh every day.  
I have just come in from the  
Tropical Disease Society - at  
the Pasteur with Saveran.  
A young fellow read a most  
interesting account of the treatment  
of sleeping sickness by the

Much Curmishin - some 500

cases. Good results 21 for a  
amost goes but recurrences seem  
the rule. 'Twas rather sad as  
in the room was one of the young  
fellows who went out, who has  
the disease, tho. he looks remarkably  
well. Maguin had a good laugh  
with me the other night about  
your letter in which you thought  
he, Ma had had overtures from  
the John Hopkins. It was, as  
no doubt he has written, about  
V. Piquet, Eschenbach's 1st assistant.

I do not know whether or not  
you met him in Washington.

I saw him here four or five  
times, and heard him read  
a paper at the Societe de

Hospitals and at the Pediatric. He talks  
French like a native & his English is wonder-  
ful. He looks & from all accounts is, a  
gentleman, who is a great master of  
they have any thoughts of importing, he  
is the man. Tuesday eve Sandouff gave  
a great dinner - really a beautiful affair  
30 at table & he made a really remarkable  
speech - He must have been posted by  
some one - he had read several of my books  
& referred to my trib. article in the last  
book in Gallic Genes. I was warned by Marie-  
dear soul! - that there was to be a little speech  
so I got off a phrase in two in French & then laid  
in the Guller. <sup>in English</sup> Miss Ode has sent the  
memo to Miss Heron & has asked her to send

on to you. The annals of the Faculty are most interesting  
After dinner there was a big reception - about 300.  
All the young Agassiz, their wives & c. missed & at 11<sup>30</sup>  
a supper. Madame L.'s first husband owned the Kenne-  
bec Disp. includes & has a magnificent Ad Empire hotel -  
beautiful rooms. Charoffort gave us a lovely dinner  
on Tuesday & on Friday Raymond so we are very  
full. Mrs O. goes on Saturday to 14 feet & brings Isaac  
I have been getting a few good things a first ed. of  
aventurifer wh. I have been after for some years, and  
a Gilbert's Magnet; the first great scientific book published  
in England. I got it at the Acubert sale last week. Did  
you get a catalogue? Morgan bought the Coblenz 17 of  
them, 12 perfect! Weather has bottles - four days of darkness  
fog. We shall be here until the 10th Jan., then on  
to Lyons & Knechtelheim.

Love to Mrs Jackson & the boys. Yours ever  
FT Peck
