STATION HOSPITAL, COMMUNICATIONS ZONE - Continued

In addition to the military personnel listed hereon, the services of the following civilians are required:

Size of hospital	Head dietitian	Dietitian	Head physical therapy aide	Physical therapy aide	Seamstress	Dental hygienists
250-bed hospital	1	1	1	1	1
500-bed hospital	1	3	1	3	1	2
750-bed hospital	1	5	1	5	2	2

The serial number symbol shown in parentheses for certain specialists is an inseparable part of the specialist designation. For qualification analysis see corresponding serial number in section VI, MR 1-8 (old number 1-3).

This table represents the normal personnel requirements for station hospitals of various capacities in the communications zone. The bed capacity authorized for these hospitals is 5 percent of the total strength they are designated to serve. (For example, a station hospital located where 5,000 military personnel are assembled should have a bed capacity of 250; where 10,000 are assembled a bed capacity of 500; and where 15,000 are assembled, a bed capacity of 750).

The administrative service ordinarily includes headquarters, registrar, receiving office, detachment of patients, medical detachment, medical supply, general supply and utilities, officer, detachment and patients' messes.

The professional service includes the medical, surgical, dental, laboratory, and roentgenological services.

The distribution of the personnel shown hereon to the various services of the hospital is left to the discretion of commanding officers of the hospitals.

For special qualifications and functional assignment of officers the following breakdown may be applied:
