CLINICAL INSTRUCTION.

DURING THE WINTER SESSION,

Daily Clinical Lectures are Delivered

IN THE HOSPITAL,

BY

MEMBERS OF THE FACULTY OF THE COLLEGE,

AND DURING THE REMAINDER OF THE YEAR, BY

MEMBERS OF THE HOSPITAL STAFF.

THE MEDICAL STAFF.

The first election of a Hospital Staff was made by the Board of Trustees, March 28th, 1877. Since then, the following changes have occurred in its organization: F. F. MAURY, M. D., one of the Surgeons, died June 4th, 1879, and JOHN B. ROBERTS, M. D., one of the Physicians, resigned February 7th, 1878. The present Staff is as follows:—

Surgeons,

JOHN H. BRINTON, M. D. S. W. GROSS, M. D. R. J. LEVIS, M. D.

Physicians,

J. SOLIS-COHEN, M. D.

JAMES C. WILSON, M. D.

OLIVER P. REX, M. D.

W. W. VAN VALZAH, M. D.

(Elected November 27th, 1878.)

Ophthalmic Surgeon,

WILLIAM THOMSON, M. D.

Gynæcologists,

F. H. GETCHELL, M. D. J. EWING MEARS, M. D.

Aural Surgeon,

L. TURNBULL, M. D.

Pathologist,

MORRIS LONGSTRETH, M. D.

The following-named persons have served in the Hospital, since its organization, as

Resident Physicians:

CHARLES WIRGMAN, M. D. WM. L. KNEEDLER, M. D.

A. POICHET, M. D.

WILLIAM RODMAN, M. D.

SAMUEL E. JAMES, M. D. R. M. AMES, M. D.

W. C. McCLANAHAN, M. D. C. E. BEAN, M. D.

G. W. YORK, M. D.

Druggists,

SAMUEL E. JAMES, M. D.

JOHN L. WRIGHT, M. D.

W. SAVAGE.

Assistant Druggists,

DAVID ULRICH,

WILLIAM RIGHTER,

J. HAZLITT,

W. H. SMITH.

Steward,

Housekeeper,

Engineer,

MISS O. LOGAN.

W. H. ROSS.

Report.

The success of the Jefferson Medical College has been influenced to no little extent by those advances in practical teaching which have given character to the School. Chief among these has been the development of the great system of College Clinics, and the establishment of this method of instruction dates from the very foundation of the Institution. In fact, an infirmary had been opened within the walls of the Jefferson Medical College in May, 1825, in advance of its first session, and on the ninth of that month Dr. George McClellan performed the first surgical operation in the anatomical amphitheatre.

The system of practical teaching thus introduced was continued with regularity down to the year 1841, the date of the reorganization of the School. By the Faculty then elected by the Trustees, the College Clinic, medical as well as surgical, was made a prominent feature in the curriculum. The Clinic had become, and was recognized as, the right arm of the College. To give it greater strength and efficiency, the establishment of some sort of hospital or infirmary accommodation upon a more permanent footing was, however, needed. Accordingly, about 1843, rooms adjoining the College building were rented and fitted up for patients operated upon at the public Clinic.

This accommodation was gradually increased as needed, until the College possessed a miniature hospital, with a capacity of fifteen or twenty beds. The hospital thus organized served its purpose for twenty odd years. During the latter days of this period, the necessity for the foundation of a clinical hospital upon an extended scale had become firmly impressed upon the minds of the Trustees, Faculty and Alumni of the School. The progress of medical science, changes and advancements in the manner of teaching, and above all, the interests of the future students of the College, alike urged the friends of the Institution to put forth their best endeavors to give to the Jefferson Medical College a great clinical hospital, worthy of the School, and destined, it was hoped, to play an important part in its beneficent teachings.

Urged by these considerations, the executive committee of the Alumni Association, in December, 1872, met informally at the College, when it was determined to make an effort in the desired direction. To test the temper and earnestness of the meeting, subscriptions in aid of a future hospital were called for then and there, when nearly fifteen thousand dollars were at once pledged, in the event of any feasible plan for the erection of a hospital being set on foot. Committees were appointed to confer with the Trustees, to solicit subscriptions from the Alumni and from the public, and to petition the Legislature of the State for the grant of one hundred thousand dollars. The efforts of the Alumni were approved and seconded by the Trustees, and the respective committees vigorously

began their work. Eventually, subscriptions from individuals and corporations were obtained, as set forth on another page of this Report, contingent on the raising of a subscription fund of two hundred and fifty thousand dollars by the 10th day of June, 1874.

On January 29th, 1873, a committee of the Trustees, Faculty and Alumni visited Harrisburg, to advocate the claims of the Jefferson Medical College to a liberal appropriation from the State for the erection of the hospital. The committee had an interview with the Committee of Finance of the Senate, and with the Committee of Ways and Means of the House of Representatives, in joint meeting. The views then expressed were favorably received by the legislative committees, and a clause appropriating one hundred thousand dollars for the Jefferson Medical College Hospital was inserted in the general appropriation bill, which passed both Houses, and was approved by the Governor April 9th, 1873.

At a meeting of a committee of the Faculty and Alumni Association, held April 2d, 1874, it was resolved "that the Board of Trustees be respectfully requested to appoint, at their next meeting, to be held Tuesday, April 7th, a committee, consisting of three of their number, to co-operate with a joint committee of the Faculty and Alumni in devising measures to obtain subscriptions for the purchase of a site, and the erection of a new college and hospital building, and to secure the appropriation made by the State Legislature."

In response to this communication, a committee, con-

sisting of Messrs. Phillips, Lippincott and Gardette, was appointed on the 7th of April, 1874, to confer with the joint committee of the Faculty and Alumni. On the 20th of April, at a special meeting of the Board of Trustees, their committee reported that they had met a similar committee of the Faculty and Alumni; and after an interchange of views they were unanimously of opinion that the time had come when the Board should have a Committee of Finance, through whom the subscriptions might be made and collected. It was then, on motion, resolved "that a Committee of Finance, to consist of three Trustees, be appointed to receive subscriptions and payments of subscriptions to the new College and Hospital, and that the said committee invest all funds received, in such manner as they deem advantageous, subject to any further action of the Board." Messrs. Henry M. Phillips, Asa Packer and James Campbell were appointed as a Committee of Finance.

In October, 1874, a munificent subscription of \$50,000, for the endowment of the proposed hospital, was made by Mr. I. V. Williamson. This donation was made subject to certain conditions, one of which was the completion of the hospital within three years from the date of the subscription.

Encouraged by the success which had thus far attended the combined efforts of the friends of the School, the Trustees now proceeded to the selection of a site for the new hospital, and its immediate erection. After mature consideration, and the examination of many localities,

a committee of the Trustees, consisting of Dr. E. B. Gardette, *chairman*, and Messrs. G. W. Fairman, Joseph Patterson, W. A. Porter, J. R. Ludlow, Joseph Allison, and Furman Sheppard, appointed by the Board to select a site for the contemplated college hospital, after consultation with the Faculty and with the executive committee of the Alumni, decided upon the site on which the hospital now stands, near the College.

The Board of Trustees accordingly directed, on April 21st, 1875, the purchase of this lot, 106 feet front by 107 feet 6 inches in depth, for \$45,000, and in the following month the purchase was consummated. In March, 1876, the adjoining lot to the east, 20 feet front on Sansom street, was also purchased for \$8,000.

On the 14th of June, 1875, the Board of Trustees substituted a "Building and Finance Committee" for the Finance Committee previously appointed. This new committee was composed of nine members, five of them being Trustees, two members of the Faculty, and two members of the Alumni Association. The committee was instructed to "call in, as early as practicable, the State appropriation from the State Treasurer, and all subscriptions and donations of money to the hospital fund through the canvassing committee of the Alumni Association or others. The said committee shall obtain plans and specifications for a hospital building, in all respects suitable to the wants and purposes of the College, and have power to erect the hospital."

The following gentlemen were appointed to act on the "Building and Finance Committee:"

From the Board of Trustees—Dr. E. B. Gardette, chairman, and Messrs. Jos. Patterson, J. R. Ludlow, C. M. Prevost and G. W. Fairman; from the Medical Faculty—Dr. Biddle and Dr. Da Costa; and from the Alumni Association—Dr. Brinton and Dr. Maury.

In September, 1875, plans for the erection of the hospital building were obtained from several prominent architects of this city. After careful examination, those of Messrs. Furness and Hewitt were adopted, and proposals were immediately invited from contractors for its erection. On November 4th, 1875, the contract for the building (exclusive of heating and plumbing work) was awarded to Mr. John Ketchum for \$94,787.93. This sum was afterward somewhat increased by the adoption of changes in the building plans, incident to the newly acquired possession of the eastern lot.

By March, 1876, the excavations and foundation walls were finished, and by the end of November, 1876, the entire building was under roof. During the winter, the heating apparatus and the plumbing work were completed. On the 27th of April, 1877, the new hospital, having been entirely finished, was officially transferred by the Building and Finance Committee to the Board of Trustees; and on the 1st of May it was thrown open to the inspection of the public. The equipment of beds, bedding, and furniture generally, had in the meantime been provided by the action of a special committee, consisting of Drs. Wilson and Brinton, under an appropriation of \$7,500 by the Board of Trustees.

The formal opening of the hospital for the reception of patients was deferred until September 17th, 1877. The inaugural addresses on that occasion before the Trustees, Faculty, Staff and Alumni of the College, and the invited public, were delivered by Dr. Gardette, the President of the Board of Trustees, and by Dr. Joseph Pancoast, the Emeritus Professor of Anatomy.

The cost of building and furnishing the hospital may be thus set forth, up to the time at which it was opened for patients:

Cost of the two lots of ground,	\$53,000.00
Cost of building, including heating apparatus, plumbing	104.010.02
and gas fitting, architects' fees, insurance, etc.,	124,919.83
Outfit, bedding, furniture, etc.,	8,000.00
Since September 17, 1877, and up to September 30, 1880, the following sums have been expended, viz:	\$185,919.83
For additional furniture,	1,052.94
For repairs and permanent improvements,	4,436.42
Total cost of hospital building and furniture up to September 30, 1880,	\$191,409.19

In explanation of the sums spent on the hospital during the last three years, it is right to state that these expenditures were for:

The erection of a costly fire escape, which can be reached from every portion of the building.

The fitting of galvanized iron gratings to all of the windows in the hospital above the first floor.

The repairs and alterations of the floors in all the wards.

The fitting of a steam heating apparatus in the pantry of the fifth floor.

The purchase of an auxiliary engine, and alterations in the machinery.

The purchase of additional furniture and bedding for the marine ward.

On November 4th, 1875, the Board of Trustees appointed a committee to petition the Legislature for an additional grant of one hundred thousand dollars. This application was accordingly made, and after an interval of three years, the act appropriating this sum passed the Legislature, and was approved by the Governor of the State June 17th, 1878. By the terms of the act, the sum appropriated was to be paid in instalments of ten thousand dollars each, which are now in process of payment.

It is proper to state here that the passage of this act was greatly due to the energy and zeal of the late Dr. Maury, one of the surgeons to the hospital, who devoted his time and abilities unsparingly to the interests of the Institution.

DONATIONS.

Since the organization of the hospital, numerous gifts have been received, which are gratefully acknowledged by the Trustees.

In March, 1877, Mrs. N. M. Grigg presented an original marble bust, by Cannon, of her brother, the late Dr. George McClellan, the founder of the Jefferson Medical College. The bust, with an appropriate inscrip-

tion, has been placed by the President of the Board of Trustees in the clinical amphitheatre, overlooking the arena. Oil portraits of Professors S. D. Gross, Joseph Pancoast, Robley Dunglison and J. B. Biddle, have been presented by the Alumni; one of Professor J. Aitken Meigs, by the class of 1879-80, and one of Professor Charles D. Meigs has been presented by his son, Dr. J. Forsyth Meigs. All of these have been hung on the walls of the amphitheatre. An original portrait of himself has been received from Dr. B. Howard Rand, which has been placed in the reception-room, and one of Dr. F. F. Maury, the gift of his brother, Mr. J. Robb Maury, has been placed in the private operating-room. original bronze bust of Dr. J. Marion Sims, presented at the request of the Alumni, has been by them transferred to the Trustees, and also placed in the reception-room of the hospital.

Through the liberality of Mr. Henry C. Gibson, one of the Trustees, the smoking-room for patients has been comfortably fitted up, provided with book-cases, and the walls hung with engravings. Various pieces of carpets have from time to time been furnished by the Messrs. Dobson. A valuable donation of fifty tables has been received from Mr. Brinton Coxe. These tables are designed for the most helpless, and are so constructed as to slide over the bed, thus enabling the occupant to eat or read without exertion, and without change of position. Donations of books and papers have been received from Dr. Gardette, Mr. W. H. Drayton and others.

Illustrated journals in the Russian language have been constantly sent by Mrs. William S. Phillips. These have proved very acceptable to the Russian and Scandinavian sailors, so frequently to be found in the wards.

About two hundred volumes of serials have recently been sent to the hospital by Mrs. C. F. Abbott, who, at the same time, kindly provided book shelves for their reception, uniform with those already erected in the library. Many journals have also been presented by the Philadelphia Club, and by the Union League.

Through the exertions and interest of Mr. G. Osborne, boxes, properly labelled, for the reception of newspapers for the hospital, have been procured. One of these, by the kindness of Mr. Bradford Clarke, has been placed at his store, at the southwest corner of Broad and Chestnut streets. The other, by the courtesy of Mr. D. L. Gibson, has been placed at the ticket office of the Baltimore and Ohio Railroad Company, at 1101 Chestnut street. The boxes are usually filled with reading matter from by-passers during the day, and their contents are daily conveyed to the hospital.

The following newspapers are kindly sent to the hospital from the respective publication offices, free of cost: North American, Ledger, Bulletin, Record and Progress.

The services of the Ladies' Flower Mission are also gratefully acknowledged, and the lovely flowers, which in season are so often brought to the hospital, are most thankfully welcomed by the patients.

ENDOWED BEDS.

By authorization of the Trustees, the contribution of five thousand dollars, or an annual payment of three hundred dollars, when made by a corporation or by an individual, has been regarded as an endowment for the establishment and support of a free bed, the occupancy of which is subject to the nomination of the donor.

The following are the free beds at present in the hospital, and which are known by the names of their founders:

The "I. V. Williamson" ten beds. The "Henry C. Lea" bed. The "Thomas A. Scott" bed. The "A. Whitney" bed. The "Asa Packer" bed. The "A. J. Drexel" bed. The "Joseph Pancoast" bed. The "Jesse George" bed. The "T. D. Mütter" bed. The "Reading Railroad" two beds. The "Philadelphia Contributionship" two beds. The "William Struthers" bed, supported by annual payments made by Mrs. Rudolph Ellis. The "Drifton" bed, supported by the annual payments of the Misses Coxe.

It is much to be desired that this feature of the endowment and naming of free beds may be more generally known and appreciated by the community. A free bed, supported by the beneficence of its founder, is never idle. It is forever open to the occupancy of some one, afflicted by disease or stricken down by accident, and a name, it may be in memoriam, given by a donor, will thus stand linked with a lasting charity.

The Trustees would also suggest to the proprietors and managers of factories, machine shops and other industrial works, that the foundation and possession of a free bed in a hospital is a matter of no little importance to them. Workmen are at all times liable to be prostrated by accident or disease in the discharge of their daily duties, and at such times it often happens that they can be better treated in a hospital than at their own homes. The duty and interest of the employer are alike concerned in providing for them prompt and efficient surgical or medical care, and in no way can this be more readily accomplished than by the possession, on the part of the employer, of a hospital bed to which he can send a case of injury or disease as a matter of personal right. Experience, too, has shown that the sufferer himself is more content when he feels that he is being treated, not as an object of charity, but, as it were, under the supervision and care of his employer.

Viewed from every stand-point, it is scarcely possible to conceive of any form of benevolence more direct or continuous in its working than the foundation of a hospital bed, and the Trustees confidently hope that in the near future many such may be established.

On the last page of this Report will be found a form of endowment and bequest.

MUSEUM.

The importance of a pathological museum in connection with the hospital was early manifest to the Trustees. It is impossible to over-estimate the value of such a collection. Objects of pathological interest, well preserved and judiciously employed, serve most forcibly to illustrate the teachings of the clinical lecturer, and to make clear to the mind of the student the nature of the changes which may have taken place in the living patient before him. A specimen of broken bone, diseased joint, crushed limb, or morbid growth, impresses the student far more strongly than can the lecturer's unassisted eloquence.

Impressed with these views, a committee of the Board of Trustees, consisting of Messrs. Sheppard, Wilson and Gibson, reported on the 27th of November, 1878, to the Board in favor of immediate action for the establishment of a museum for didactic instruction in the College, and for clinical instruction in the hospital. On the recommendation of the committee, \$250 was appropriated for the expenses of the museum for the year then ensuing. Since that time an annual appropriation of \$300 has been voted by the Trustees. With the means thus placed at the disposal of the committee, the work of the organization of the museum has been actively carried on. Cases were erected, glass jars purchased, and alcohol obtained from the Government bonded distilleries free of duty. The services of an experienced artist were made avail-

able; wet preparations were mounted in jars, and casts and wax models were made of every proper case passing through the clinic, or received into the hospital wards. The whole collection thus obtained was then arranged under the direction of the curator, Dr. Longstreth, the pathologist of the hospital.

The present condition of the museum is exceedingly satisfactory. The preparations on the shelves are rapidly increasing in number, and the value of the cabinet as a means of clinical illustration is being daily made more and more evident.

The following tabulations exhibit the receipts and expenditures for the three years following the opening of the hospital, from September 17, 1877, to September 30, 1880, and also the statistics of the hospital and out-patient departments.

THE OUT-PATIENT DEPARTMENTS.

The out-patient departments, or public dispensaries, are open daily throughout the year, with the exception of Sunday. These departments are under the immediate charge of the members of the Faculty of the College and the Hospital Staff, during their respective terms of service. All patients presenting themselves are subjected to careful examination, and, in proper cases, the necessary operations are performed in the hospital amphitheatre, in the presence of the clinical class. In the more serious cases, the patients are received into the wards of the hospital for after-treatment.

The medical and surgical attendance upon all outpatients is absolutely gratuitous. The prescriptions ordered are furnished them from the dispensary of the hospital, at a very low rate, when they are able to pay for them; when they are not, all medicines are given to them without cost.

The daily hours set apart for the attendance of outpatients at the hospital is as follows:

Surgical out-patient department, from 12 to 2 P. M. Medical out-patient department, from 12 to 2 P. M. Gynæcological out-patient department, from 12 to 2 P. M.

Ophthalmological out-patient department, from 1.30 to 3 P. M.

Aural out-patient department, from 1 to 2 P. M. Throat out-patient department, from 12.30 to 2 P. M.

TABULAR STATEMENT OF OUT-DOOR PATIENTS.

	1877, to	Sept. 17, Sept. 30, 78.	to Sej	et, 1, 1878, pt. 30, 79.	From Oct. 1, 1879, to Sept. 30, 1880.

ISAAC BARTON, M.D.,

MARINE WARD.

On May 10th, 1879, the Trustees, through their hospital committee, entered into a contract with the United States Marine Hospital Service, for the reception, board and treatment of all sailors of the mercantile marine requiring hospital treatment in the port of Philadelphia. This arrangement took effect on the 10th of May, 1879, and was renewed on the 14th of July, 1880.

The treatment of the marine patients is conducted by a medical officer of the United States Marine Hospital Service, detailed for that duty, who in many cases avails himself of opportunities of consultation with the hospital staff. His assistant, appointed by himself, with the consent of the Board of Trustees, is resident in the hospital.

The terms of the contract made between the Government and the hospital have been faithfully carried out, and the whole arrangement has been characterized by perfect harmony and kind feeling on the part of the marine surgeon and the hospital staff.

The officer of the United States Marine Hospital Service on duty at this port when the first contract was entered into, was Dr. E. J. Dæring, who was succeeded, in November, 1879, by Dr. George W. Stoner, U. S. M. Hospital Service, who is the present officer at this station.

The following-named gentlemen have served successively as resident physician for the marine ward:

C. C. Beery, M. D.; J. W. Hazlitt, M. D.; H. B. Baker, M. D.; J. L. Wright, M. D.

Since the above paragraph was written, Dr. Stoner has been relieved from duty in the hospital, and has been succeeded by Dr. J. M. Gasserway, U. S. M. Hospital Service.

In reviewing the work of the hospital, from its establishment up to the present time, the Trustees believe that they have ample reason to congratulate the contributors upon its success. They will be gratified to learn that the hospital lot and building are entirely free from debt. A more ample endowment is, however, necessary, in order that the Institution should attain its full measure of usefulness and beneficence. To that end, its claims are respectfully submitted to the favorable consideration of the community, in the hope that, from time to time, its funds and resources may be increased by such gifts as those who are charitably disposed may be inclined to bestow—all of which will be thankfully received, and will be faithfully applied as the donors may be pleased to indicate.

By authority of the Board of Trustees,

E. B. GARDETTE, M. D.,

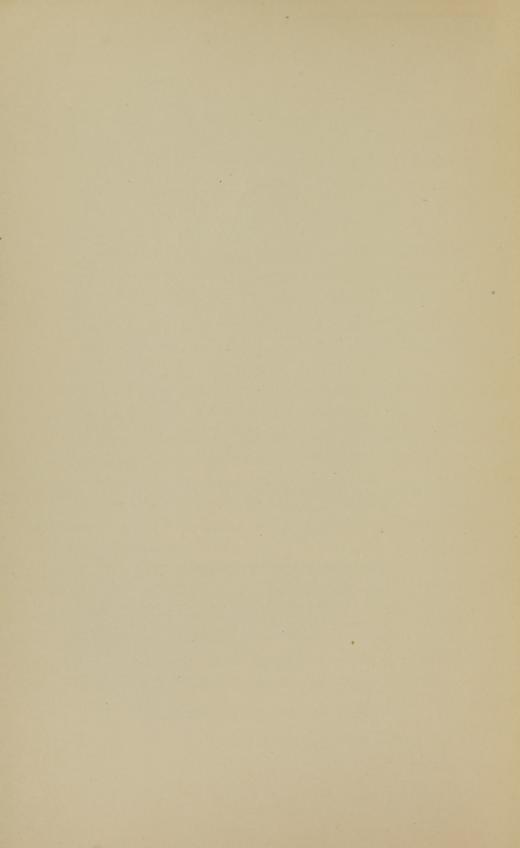

FORM OF BEQUEST.

"I do hereby give, devise, and bequeath, to the Trustees of the Jefferson Medical College, of Philadelphia, their successors and assigns, for the use of the Jefferson Medical College Hospital——'

[Here mention the amount of the bequest, or describe the property devised.]

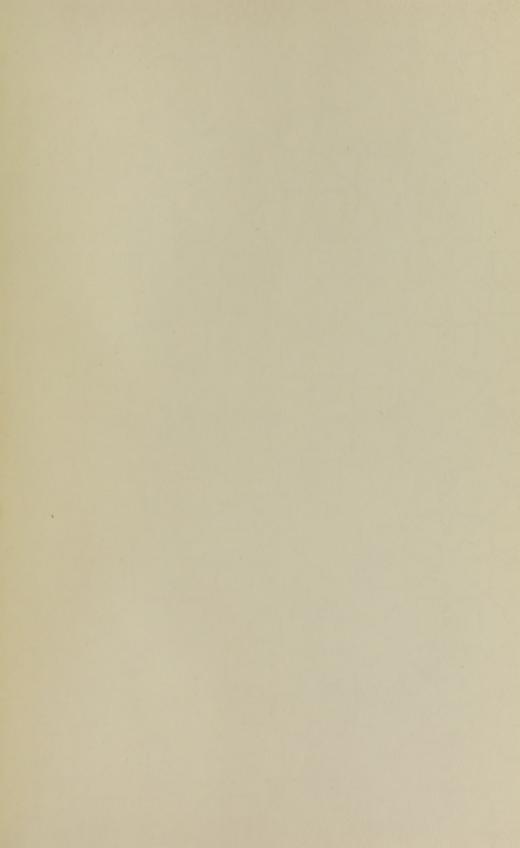

FORM OF ENDOWMENT OF A MOSPITAL BED.

"I do hereby give and bequeath to the Trustees of the Jefferson Medical College, of Philadelphia, the sum of five thousand dollars, for the endowment of a free bed in the Jefferson Medical College Hospital, said bed to be known and designated as the free bed."
