## INTRODUCTION

This check list has been compiled from the holdings of the Art Collection of the National Library of Medicine. It brings together, in one format, the names of 1874 physicians and scientists whose portraits are on file there.

In order to limit the selection to individuals whose published works have made classic contributions to the history of medicine, Garrison and Morton's Medical bibliography, an annotated check-list of texts illustrating the history of medicine. 2 ed. 1954 has been taken as authority.

Until such time as a more comprehensive catalog can be issued, we hope it will serve as a useful guide to the medical portraits in the collection.

Photoreproductions, in a glossy or matt finish, of all individuals listed are available for purchase at a nominal fee. All orders and inquiries should be addressed to the Art Section, National Library of Medicine.
