NOTICE.

THIS Catalogue comprises the entire Medical and Miscellaneous Library of the Late DR. JOHN W. FRANCIS, LL.D., in all over EIGHT THOUSAND VOLUMES.

Very many of the books are copies of the best English Editions. In the Medical portion of the Library will be found good copies of many ancient and famous Authors, such as, Hippocrates, Galen, Celsus, Boerhaave, Albinus, Morgagni, and Van Helmont. It is especially rich in works on the subject of Medical Jurisprudence, including the best German and French authors. There is a folio copy of Zacchias, who wrote the first treatise on Forensic Medicine; and a complete set of Maurice Mejan's *Recueil des Causes Célèbres*, in eighteen volumes.

We would call particular attention to the department of Journalism, in which the Library is unusually full. Of Medical Journals, there is a perfect set, in good order, of the *Dictionnaire des Sciences Médicales*; The New York Medical and Physical Journal; the American Medical and Philosophical Register; and the New York Journal of Medicine and other valuable American Publications.

Among the Literary Journals will be noticed the Transactions of the Royal Philosophical Society, including the volume of Cronnian Lectures on Muscular Motion; a set of which is very seldom found; Tilloch's Philosophical Magazine; Thompson's Annals of Philosophy; Rees' Encyclopædia; Brewster's Edinburgh and the Penny Cyclopædia. There are also many valuable Biographical Dictionaries, including Chalmers' in thirty-two volumes. The Collection of Sermons; Theological, Controversial, and Doctrinal Works, is quite extensive and worth attention.

The books relating to early American History are numerous, and many of them good copies of editions not often met with. Of distinguished American Authors, the Library has a large collection, among which are Marshall's Life of Washington, in quarto, full calf; and large paper copies of Adams', Franklin's, and Washington's Works.

A large number of books were presented by the authors, and bear their autographs.

There is also a large mass of PAMPHLETS, many of which are valuable, and some very scarce and in good preservation—worthy of special attention.
