## Explanatory Notes of the Compiler of the Catalogue.

—:0:—

The books are classified alphabetically, first, according to subjects, and secondly, according to the names of the authors.

The abbreviations 4to., 8vo., 12mo. and 18mo., have reference to the size of the pages in each work, folio being the largest size, which is simply one fold in the entire sheet of paper.—4to. meaning that the sheet is folded twice (giving 4 pages) and so on, 8vo. is the usual size for medical works.

The signs A1, A2, B1 and B2, have reference to the condition of any book in question. Thus:

A1 means almost, or quite as good, as new.

A2 “ very little damaged.

B1 “ considerably abused.

B2 “ in a very dilapidated condition.

Attention is directed to works which the compiler of the catalogue considers particularly desirable by exclamation points enclosed in brackets, thus [!!].

The abbreviated names of cities, as Lond.—Phil.—for London and Philadelphia, will be readily understood.

GEORGE FARRAR PATTON, M. D., comp.

Of New Orleans, Compiler.
