SOME ACCOUNT  
OF THE  
**PENNSYLVANIA HOSPITAL.**

---

THE PENNSYLVANIA HOSPITAL was founded by a number of the benevolent citizens of Philadelphia, incorporated in the year 1751, by an act of the provincial legislature, as "The Contributors to the Pennsylvania Hospital." Every contributor of *ten pounds*, (twenty-six dollars sixty-seven cents) or upwards, being a member of the corporation, with a vote in its elections, and eligible to be appointed to the management of its concerns.

The design of the Hospital is general, its charter providing for the reception of insane persons, and those afflicted with all other maladies *not infectious*. A Lying-in department, authorized by a subsequent act of Assembly, for the accommodation of poor married women, of respectable character, has been founded on a donation from the First Troop of Philadelphia City Cavalry, of money received by them for military services in the war of the revolution. The number

of women annually received into this department, is now upwards of seventy.

The charter of this institution provides, that no part of its income shall be appropriated to any other purpose, than to the support of the sick and diseased poor, and providing the necessary buildings for their accommodation; and that those whose diseases render them proper objects of the charity, shall be received from any part of *Pennsylvania*, without partiality or preference.

The contributors meet annually on the first Monday in the month of May, to elect from their body, twelve Managers and a Treasurer, to serve during the ensuing year.\* The law regulating their duty and trust, provides, that they shall receive no emolument whatever for the performance of their official duties. The appointment of the physicians and other officers and servants of the institution; the regulation of its internal economy; and the general charge of its income, are intrusted to the Board of Managers; of whose number the

\* The following are the names of the gentlemen who were first elected to discharge the duties of this important trust:—

#### MANAGERS.

TREASURER—John Reynell.

presence of at least eight, and the concurrence of seven, are necessary for the transaction of business. The stated meetings of this board, are held on the last Monday of each month.

The Managers elect annually three physicians to have charge of the medical department; three surgeons to the charge of the surgical department; and two physicians for the lying-in department: all of whom must be Doctors in Medicine, and members of this corporation.

Two young gentlemen, *graduates* of medicine, reside in the Hospital, and take charge, alternately, of the surgical, and the medical and obstetrical departments, under the direction of the visiting physicians and surgeons. One of the residents is elected annually to serve two years.

An apothecary is engaged at a salary, to prepare and dispense the medicines prescribed by the physicians.

The physicians and surgeons of this Hospital have uniformly rendered their important aid gratuitously.\* The students of medicine who attend the practice of the Hospital physicians, pay a fee of ten dollars each for the privilege: these fees, which in European hospitals are a perquisite of their medical staff, the professional gentlemen, attached to the Pennsylvania Hospital, have generously devoted to the foundation and endowment of a Medical Library, which now con-

---

\* The gentlemen who had the honour of originating this practice by a voluntary offer of their services in the infancy of the institution, were Dr. Lloyd Zachary, and Drs. Thomas and Phineas Bond. To these were afterwards added Drs. Thomas Græme, Thomas Cadwalader, Samuel Preston Moore, and John Redman, as physicians and surgeons for the first year.

sists of about six thousand volumes, comprising a large proportion of the most valuable ancient and modern works on the science of medicine; with many rare treatises on Botany, and other branches of natural history. Students have the privilege of using this splendid collection, while attending the Hospital practice; and a right to its use during life is granted for the sum of twenty-five dollars.

The six physicians and surgeons having charge of the medical and surgical departments, divide the year into three equal periods, one physician and one surgeon attending at the same time, and continuing in charge of their respective wards four months. The two physicians having charge of the lying-in department, continue in office *six* months each. In extraordinary cases, and before the performance of surgical operations, it is usual for the gentleman in attendance, to hold consultation with his colleagues.

The Board of Managers appoints monthly, a committee of two of its members to admit and discharge patients, and to exercise a particular superintendance over the internal concerns of the institution. This committee, and the attending physicians, meet at the Hospital twice a week (on Wednesday and Saturday) for the transaction of business. To facilitate applications for admission, the names of the attending managers and physicians are regularly advertised in several of the daily papers.

The usual mode of obtaining admission into the Hospital is, by first applying to one of the physicians in attendance; who, after examining the patient, gives a certificate of the nature of the disease, and the propriety of its admission into the Hospital; this is addressed to the attending managers, who settle the terms of admission, and grant their order di-

recting the steward of the Hospital to receive the patient. This course is only departed from in *two* cases--that of seamen, who, (by a special agreement) after receiving a certificate from the physician, have only to obtain the order of the Collector of the Port ;—and in cases of accident,—it being a rule to receive by day or night, every person who meets with an accident requiring surgical aid, without requiring any security of the parties who bring the patient to the Hospital ;—provided the accident occurs in Pennsylvania, and the sufferer is brought *immediately*, or within twenty-four hours.

After the accommodation of as many *poor* patients as the state of their funds will justify, the Managers have authority to receive *pay* patients ; any profit derived from this source being devoted to increase the fund for the maintenance of the poor. The rates usually charged are from three to six dollars per week, according to the circumstances of the patients. Pay patients are not admitted on a deposit of money, or on the responsibility of strangers ; the only security accepted, is that of some respectable resident in Philadelphia. At their own desire, patients may be attended, exclusively, by either of the Hospital physicians they may prefer, but in such cases it is expected that the affluent will pay the physician as though attended elsewhere.

As this institution is intended to be a hospital for the cure of disease, not a permanent asylum for poverty and decrepitude, the Managers can admit none on the charity list, whose diseases are chronic and incurable, except those afflicted with insanity : and it is imperative upon them to discharge all patients, who, after a reasonable time of trial, may be deemed incurable.

The number of the patients to be received on the charity of the institution, is fixed from time to time by the Board of Managers; it is now nominally one hundred, but as no serious cases of accidental injury are ever turned away from the Hospital-gate, the number of its poor patients is frequently one hundred and twenty, and for some time past has rarely been less than one hundred and ten.

About one-third of the patients on the poor list are insane: it has been found necessary thus to limit their number, on account of the great length of time such patients have remained, to prevent their occupation of the house to the exclusion of the necessitous sick and wounded.

A new arrangement has, however, been introduced, which, already productive of much good, promises to render this interesting department of the institution of far greater public utility than heretofore.

Experience has demonstrated, that mental maladies are almost insusceptible of cure, except in their earlier stages; every thing appears to depend on the prompt removal of the patient from scenes and persons associated with the mental hallucination, and an early subjection to a proper course of medical and moral treatment. It being, therefore, of great importance to open the door of admission as widely as possible to recent cases, the Managers of the Hospital have agreed, that in future, except under particular circumstances, insane persons shall be received on the charity, but for limited periods; sufficient security being taken that they shall be removed by their friends when the disease becomes fixed, and the restoration of reason is no longer to be expected. This regulation has already afforded relief in a number

of cases which must otherwise have been excluded from the means of cure.

The square on which the Hospital stands, is bounded by Spruce and Pine, and Delaware Eighth and Ninth streets. It measures four and a quarter acres. With the exception of about one hundred and fifty feet on Pine street, furnished with an iron railing, which affords a view of the south front of the building, the whole lot is enclosed by a brick wall. About seven-eighths of this square were purchased by the Managers in 1754, for the sum of £.500 Pennsylvania currency. The remaining portion, consisting of a lot on Spruce street of three hundred and ninety-six feet in length, by sixty in depth, was presented to the Hospital in the year 1762, by Thomas and Richard, sons of William Penn.

The open square lying in parallel lines to the east, together with several lots to the south and west of the Hospital, containing in all about ten acres, have been purchased at various times, in order to secure an ample space, and free circulation of air, around the buildings.

The Hospital, surrounded, on the borders of the square, by majestic forest trees,\* exhibits a south front of venerable aspect and considerable proportions, extending east and west, two hundred and eighty-one feet. It consists of a centre building, united by long wards, of three stories in height, to two wings extending north and south. The wings are

---

\* These are Buttonwood, or Occidental Plane trees, the largest growth of the North American forest; they were planted in the year 1756, by Hugh Roberts, one of the first managers of the institution.

surmounted by cupolas, and finished so as to present respectable fronts on Eighth and Ninth streets to the east and west.

The foundation stone of this edifice was laid on the 28th of May, 1755. It bears the following inscription :

“ In the year of CHRIST  
MDCCLV  
*GEORGE* the Second happily Reigning  
(For he sought the Happiness of his People)  
PHILADELPHIA Flourishing  
(For its inhabitants were public-spirited)  
This Building,  
By the Bounty of the Government,  
And of many private persons,  
Was piously founded,  
For the Relief of the Sick and Miserable.  
May the God of Mercies  
Bless the Undertaking.”

Although able to complete but a portion of the designed building, its founders, with wise foresight, commenced upon a liberal scale, by adopting a symmetrical plan, which has been filled up at successive epochs, as admitted by the funds of the institution, and required by the exigencies of an increasing population. The eastern wing was completed and opened in the year 1756,\* the western wing in 1796, and the centre in 1805.

---

\* Prior to this time the Hospital was kept in a house, formerly the residence of Judge Kinsey, on the south side of Market street above Fifth street. This house with its grounds, including nearly one-third of a square, was hired at a rent of forty pounds per year.

The centre measures sixty-four feet in front, by sixty-one in depth, and with the balustrade surrounding its cupola, seventy-two feet in height. The long ward to the east of the centre, is eighty-one feet in length, by twenty-seven feet in breadth, and the east wing measures twenty-seven feet east and west, by one hundred and eleven north and south. The western ward measures eighty-one feet by thirty-three, and the west wing twenty-eight feet by one hundred and eleven. The increased breadth in the buildings to the west of the centre, was adopted to allow of the construction of a double range of apartments for the insane: except, however, to a very accurate eye, this difference is scarcely perceptible.

The House is thus occupied: under the basement of its centre are cellars and a bake-house; the basement story contains the kitchen—a dining-room for the Steward's family—and two sleeping rooms for female domestics. On the first or entrance story, is a handsome hall, with spacious stair-cases and passages to the different parts of the house. The apartments on this floor are four;—the Library, which is also the Steward's office, and in which the Managers meet to transact business—the Apothecary's shop—a parlour, and the Steward's chamber. The second story is occupied by the lying-in department, and chambers for the resident physicians, clerk, and apothecary. The third story contains a circular operating theatre, in which all the surgical operations, of importance, are performed, in the presence of the medical class attending the practice of the Hospital. In this apartment three hundred persons may be seated: it is surmounted by a dome with a glass cupola, affording the best

possible light to the operator. Adjoining this room are apartments for the reception of patients operated upon; and on this floor, are also the apartments occupied by the sick and lame white females.

To the east of the centre building, on the basement story, are, a long hall in which a majority of the insane patients take their meals; eleven sleeping rooms for this class of patients, and their attendants; and some store rooms. The first and second stories are occupied as medical and surgical wards, by the white men. About forty patients can be received in each ward. The garret over the long ward is at present unoccupied—those in the wing are used as sleeping rooms by some of the domestics. In the line of this wing, to the north, is a detached building of three stories, occupied by a class of white men, and by coloured people.

To the west of the centre, the whole range is occupied from the basement to the attic story, inclusive, by insane persons and their attendants. It contains, for their accommodation, fifty-six separate sleeping rooms, each about ten feet square; four larger apartments generally occupied by patients having separate attendants; the long garret, in which from twelve to fifteen of the most quiet male patients usually sleep; and the garrets of the wing which contain beds for fourteen female patients and attendants. In the first story of the wing are four day rooms, two on each side of the hall; those to the north are used by the male, and those to the south by the female patients: the men have also a day room over one of the out-houses, in which are kept the most noisy and careless of their number.

In the rear of this wing on Ninth street, is a detached building, with separate sleeping rooms, each about ten feet by eight, for eighteen insane females.

In addition to the buildings enumerated, there are, on the north part of the square, a wash-house—coal shed—stabling and carriage house—green-houses, and the building on Spruce street in which is exhibited the painting by Benjamin West, of Christ Healing the Sick in the Temple. The exhibition of this superb piece, a present from that distinguished artist, produces a revenue to the Hospital of about five hundred dollars per annum.\*

A fine statue of William Penn, of lead bronzed, (presented by his grandson, John Penn, Esq. of Stoke Pogeis, England) is placed upon a pedestal of white marble, in a conspicuous situation on the lawn before the south front of the Hospital. A chair, once the property of that great man, is preserved in the house. And a scion from the Elm tree, under which was held the celebrated treaty with the Indians in 1682,† has attained considerable size, in the square opposite the western front of the building.

The green-houses, containing a handsome collection of exotic plants, together with the ornamental lawns in front and

\* The gross amount of the receipts from this source is \$19474 75, received from 76599 visitors, and for thirty perpetual tickets at \$10 each.

† Vide a conclusive and interesting memoir on the locality of this treaty, contributed by Roberts Vaux, Esq. to the Historical Society of Pennsylvania—Memoirs of the Society, vol. 1. p. 31.

rear of the house, are under the care of a regular gardener. The attention paid to neatness, and even ornament, in the exterior and grounds, as well as in the interior of the house, gives to the whole an air of elegance, seldom equalled in establishments of this nature. This is justified, as well by donations to a considerable amount having been received for this purpose, as by the influence it is calculated to exert on the mind and health of the inmates of the institution.

A carriage and pair of horses are kept for the use of the patients; money for their purchase and support having been bequeathed by Dr. Samuel Cooper, formerly a resident physician in the Hospital. Another horse is kept for the marketing and other necessary uses of the establishment; and twelve cows for a supply of milk to the patients: these derive the principal part of their support from the adjacent lots, the property of the institution.

The provisions furnished to the inmates of the Hospital are of the best quality; the common diet is plain but nutritious, and in necessary cases, delicacies and wines are freely administered, on their prescription by the physicians. It being a recognized maxim, that, while nothing may be administered merely to pamper the appetite, nothing shall be spared which can contribute to the recovery of health.

The total number of patients admitted into the Hospital from its opening, February 11th 1752, to the 1st of December 1830, was TWENTY-EIGHT THOUSAND ONE HUNDRED AND FIVE; of whom 14,501 were poor, and 13,604 pay patients. Of these have been discharged,

In addition to these a large number of out patients have been attended by the Hospital physicians, and supplied with medicines gratuitously. This attendance on out patients had its origin in an early Rule of the Institution, that no person should be admitted, except such whose cases required the particular conveniences of an hospital. Applications were constantly made for relief, by persons excluded from the house by this regulation; and the Managers and Physicians anxious to extend the benefits of the charity to as many as possible, agreed to furnish such with medicine and advice at their homes. No regular record of these cases was preserved prior to the year 1798, but that the number was very considerable may be gathered from the subjoined extract from a memorial of the Managers and Physicians of the Hospital, presented to the Legislature in the year

1792. The effect of this regulation upon the results of the admitted cases, is also worthy of remark.

After stating the number of admissions, with their results, the memorialists continue: "But it should be observed that this enumeration doth not include the very great number of out patients, who have received medicine and advice, though their cases did not require admission into the Hospital:"—and "That admissions being only allowed in acute and dangerous cases, will account for the melancholy proportion of the dead, to the cured and relieved, it being the natural and unavoidable consequence to be expected from the cases admitted."

From the year 1797, to May 1817, when, in consequence of the establishment of Dispensaries, it was deemed unnecessary to continue this branch of the institution, the number of out patients attended from the Hospital, was sixteen thousand and sixty-three—of whom 13,040 were restored to health.

Vast as has been the amount of human misery relieved; of life preserved; and health restored, through the direct agency of this institution; an estimate of its public usefulness which should omit a consideration of the indirect benefits which it has conferred upon society, would still be far from doing justice to its merits. To the period of its foundation no school of medicine existed in this country. The youth of America, who would then qualify themselves for the practice of the healing art, had to seek instruction in the schools of Germany, of France, or of Britain. The Pennsylvania Hospital, under the care of some of the first physicians of that day, soon attracted a number of students of medicine—Lectures, the first delivered in this country, were given by its physicians—and

thus were laid the foundations of the distinguished medical school of Philadelphia. The wards of the Hospital have been the theatre of many important improvements in surgical practice. Gentlemen educated within its walls, have attained the highest rank in their profession—and several thousands of young physicians have gone out into all parts of the Union, carrying into their practice the valuable lessons and experience of this institution.

The cases of insanity admitted into the Hospital from February 1751, to December 1830, and included in the aggregate of admissions, (28,105) were *three thousand five hundred and eighty-one*. Those admitted as Mania-a-potu, or Delirium tremens, during the last eight years, (prior to which such were admitted as cases of insanity) amounted to *two hundred and sixty-two*. Of both these classes of patients, the following tables, derived from a careful examination of the Hospital records, exhibit the numbers of each sex, together with the result of their treatment.

### CASES OF INSANITY,

ADMITTED FROM FEBRUARY 11TH 1752, TO DECEMBER 1ST,  
1830.

Total.	Cured.	Relieved.	By friends without material benefit.	Elop- ed.	Died.	Re- main.
Males 2429	368	482	480	187	346	66
Females 1152	361	279	249	42	166	55
3581	1229	761	729	229	512	121

It may be remarked that a large proportion of the deaths have been the consequence of old age, or diseases having no necessary connection with insanity. Many of the elopements occurred before the Hospital was surrounded by a wall.

CASES OF MANIA A POTU OR DELIRIUM TREMENS,

ADMITTED FROM THE YEAR 1822, TO DECEMBER  
1ST, 1830.

Total.	Cured.	Relieved.	Removed by friends	Eloped.	Died.	Remain.
Males 242	155	14	12	5	55	1
Females 20	14	1	1		3	1
262	169	15	13	5	58	2

The number of insane persons in the house, now averages about one hundred and twenty.

The last thirty years have witnessed much improvement in the situation and treatment of the unfortunate subjects of insanity, throughout the civilized world; and the circumstances of the inmates of this asylum, have certainly shared in the general amelioration. Their treatment was, however, always characterized by humanity. At no period has cruelty towards them been tolerated. The attendant who is known to strike, or otherwise ill-treat a patient, is at once discharged.

The medical treatment of this class of patients, varies of course, according to the symptoms of the malady, and its connection with other derangements of the system.

The confined situation of the buildings, together with their common appropriation to the purposes of a general hospital, unfortunately prevents the adoption of an efficient system of classification, and employment; essential constituents of what is commonly termed moral treatment. Employment is believed to be beneficial in all cases, except of acute delirium;—where cure is possible, it conduces to it; and where this is not even hoped, labour ensures sound repose and a general tranquillity, which is rare in the unemployed. This being the belief, founded on experience, of those who administer the affairs of this institution, it is acted upon as far as circumstances will permit. The greater part of the females are employed in knitting, sewing, spinning, and similar avocations. It has been found more difficult to furnish employment for the men, a number of them are however employed; some in weaving tape or fringe, preparing carpet yarn, and making mattresses; and others in supplying the house with fuel, keeping in order the yards, areas, &c.; in short, every opportunity is taken to promote employment, and every disposition on the part of a patient to occupy himself innocently, is encouraged; to this end chess, drafts, and some other amusements have been introduced, and newspapers and books are furnished to those who can enjoy them. Two musical instruments, a Grand Harmonicon and a Piano-forte, have contributed many pleasant hours to the female patients; and the soothing melody of the flute is not unfrequently heard in the apartments of the men.

The diet afforded in this asylum, is more generous than that of many similar institutions, judging from the bills of fare, and other statements occasionally published. The following is the customary diet of every day.

BREAKFAST.

Bread and butter, with, occasionally hashed meat, or fish, and potatoes. Chocolate or Coffee at pleasure, both being provided.

DINNER.

Beef, veal, mutton, or pork (usually of two kinds) boiled and roasted, with a variety of vegetables. Puddings, pies, or the fruits of the season, as apples, melons, peaches, &c. &c. for dessert. Bread at pleasure.

SUPPER.

Bread with butter, and tea.

N. B. Milk, sugar, and molasses, are all freely given with the articles with which they are commonly used in private families. The bread is of fine wheat flour. Spirituous liquors, wines and porter, are only administered when prescribed by the medical attendant, who has power to order these, as well as any other article of diet at his discretion.

No difference is made in the diet or treatment of patients merely on account of their wealth. An attempt is made to class them in some measure according to the society in which they have been accustomed to move, when the mind is susceptible of such distinctions, but no difference exists between the treatment of those who pay for their board, and those who are supported on the charity of the institution; nor is it thought necessary to inform their attendants to which class they belong.

Out of one hundred and twenty patients, more than ninety usually eat at table, in companies, their attendants sitting at the same tables, helping them to their food, and partaking of the same fare. The diet of these patients is not portioned, each is allowed to satisfy his appetite. Those who do not eat at table, are the very dirty, the violent, and those placed by the physician upon a prescribed diet.

The officers and servants residing in this establishment, and receiving its pay, are—

Steward and Matron, - - - - -	2
Clerk and Librarian, - - - - -	1
Apothecary, - - - - -	1
Gatekeeper, - - - - -	1
Attendant on West's picture, - - - - -	1
Gardener - - - - -	1
Baker - - - - -	1
Watchman, - - - - -	1
Ostler, - - - - -	1
Cow-keeper, - - - - -	1
Washer-women, - - - - -	2
Cooks, - - - - -	2
Housemaids, - - - - -	3
Nurses in the women's sick wards, - - - - -	4
Nurses in the men's sick wards, four males and six females, - - - - -	10
Female attendants on the insane, - - - - -	8
Male attendants on the insane, - - - - -	4

Seventeen men and twenty-seven women. There is, in addition, one private servant of an insane patient whose wages and board are paid by the friends of the patient.

The total expenditure of the establishment, including, however, a considerable outlay on behalf of pay patients (for clothing, &c.) which is repaid by their friends, amounts to about thirty thousand dollars per annum.

A considerable sum of money is received for the board of pay patients, but the only fixed revenue of the institution is the interest of the capital stock loaned to various individuals on bonds and mortgages, and invested in ground rents. This amounts to about eleven thousand five hundred dollars per annum.

By some it may be supposed that the Pennsylvania Hospital is sufficiently wealthy; but these should reflect, that the buildings would yet accommodate many poor patients, and that this is their primary destination. The Managers of the institution have also long had in view, the erection of a separate asylum for the insane. A very desirable measure, on many accounts, for both classes: the repose of the sick being liable to much disturbance from the noise of the insane; while the narrow limits in which so many of the latter are confined, prevent the adoption of various means, probably adequate to the recovery of many individuals.

While this important object remains unaccomplished, it is hoped that the wealthy and beneficent will not, in the distribution of their charity, or the final disposition of their estates, pass by the Pennsylvania Hospital; or, considering it as already independent, give it but a testimonial of their respect. The want of an asylum for the insane, founded upon a liberal scale, with the advantage of the in-

creased light which modern science has shed on the history of the human intellect, is more urgent than any one who has not deeply investigated the subject can imagine. And those who shall lay its foundation under the benign auspices of the charter of this noble charity, will rank deservedly high, not merely among the contributors to the Pennsylvania Hospital, but on the roll of distinguished benefactors to their countrymen and species.

Although this institution has received considerable aid, towards the erection of its buildings, from the legislature of the state of Pennsylvania, its principal dependence for support has ever been upon the generous benevolence of private citizens.

It is necessary that Legacies should be given in the corporate name, viz. to "THE CONTRIBUTORS TO THE PENNSYLVANIA HOSPITAL."

Contributions and donations are received by SAMUEL N. LEWIS, Treasurer, No. 135 South Front street.

### CONTAINING :

- I. The names of the gentlemen who have served the institution as Managers, in the order of their appointment ; together with the dates of their respective elections, and resignations or death, and the time of their continuance in office.
- II. Treasurers.
- III. Physicians.
- IV. A statement of the cases of 28,105 patients, admitted into the Hospital from February 11th, 1752, to December 1st, 1830.
- V. A table exhibiting the number of insane patients of each sex, admitted in every year from the commencement of the institution ; and the result of their treatment.
- VI. A similar table of the cases of Mania a potu, or Delirium tremens, from the year 1822.
- VII. A tabular view of the Lying-in department.
- VIII. A table shewing the whole number of PAY and of POOR patients, admitted into the Hospital, and the average number of patients resident in it, during each year from its commencement.
- IX. The native countries of 5613 patients, admitted into the Hospital from April 22nd 1825, to December 1st 1830.

**MANAGERS***OF THE PENNSYLVANIA HOSPITAL.*

THE following is a list of those who have served as Managers from the commencement of the institution to the present time ; with the date of their respective elections, and the length of time they continued in office.

NAMES.	Elected.	Resign- ed.	Served the Institution.
Joshua Crosby	1751	1755	4 years.
Benjamin Franklin	—	1757	6 years.
Thomas Bond	—	1752	1 year.
Samuel Hazard	—	1754	3 years.
Richard Peters	—	1752	1 year.
Israel Pemberton, Jr.	—	1779	28 years.
Samuel Rhoads	—	1781	30 years.
Hugh Roberts	—	1756	5 years.
Joseph Morris	—	1757	6 years.
John Smith	—	1756	} 6 years.
— — — —	1761	1762	
Evan Morgan	1751	1752	} 11 years.
— — — —	1753	1763	
Charles Norris	1751	1752	1 year.
Isaac Jones	1752	1756	} 15 years and 5 mo's. (died.)
— — — —	1760	1762	
— — — —	1764	1773	
John Reynell	1752	1780	28 years.
William Griffiths	—	1753	1 year and 5 months.
Thomas Lawrence, Jr.	—	1753	1 year.
Joseph Fox	1753	1756	2 years and 7 months.
William Grant	1754	1756	2 years.
Thomas Crosby	1755	1757	1 year and 11 months.

NAMES.	Elected.	Resigned.	Served the Institution.
Daniel Roberdeau	1756	1758	} 12 years.
	1766	1776	
Charles Jones	1756	1761	5 years.
Isaac Greenleaf	—	1771	15 years
Joseph Richardson, Mer't	—	1770	14 years and 6 mo. (d.)*
Jacob Duchee	—	1758	1 year and 9 months.
Plunket Fleeson	1757	1759	2 years.
Anthony Benezet	—	1758	1 year.
John Sayre	—	—	9 months.
Stephen Shewell	1758	1760	2 years.
Thomas Gordon	—	1766	8 years.
Samuel Mifflin	—	1760	2 years.
James Pemberton	—	1780	22 years.
Jacob Lewis	1759	1774	15 years.
John Mease	1760	1768	7 years and 10 mo. (d.)

## PHYSICIANS.

THE following are the names of the gentlemen who have served the Institution as Physicians and Surgeons, in the order of their appointment ; together with the date of resignation or death, and their respective periods of service.

NAMES.	Elected.	Resign- ed.	Served the Institution.
Lloyd Zachary	1751	1753	1 year and 5 months.
Thomas Bond	—	1784	32 years and 6 months.
Phineas Bond	—	1773	21 years and 8 mo. (d.)
Thomas Græme	—	1752	6 months.
Thomas Cadwalader	—	1777	25 years and 6 months.
Samuel Preston Moore	—	1759	7 years and 6 months.
John Redman	—	1780	28 years and 6 months.
William Shippen	1753	1778	25 years and 2 months.
Cadwalader Evans	1759	1773	14 years and 1 mo. (d.)
John Morgan	1773	1777	} 8 years and 11 mo.
	1778	1783	

NAMES.	Elected.	Resign- ed.	Served the Institution.
Charles Moore	1773	1774	10 months.
Adam Kuhn	1774	1781	} 22 years and 6 mo.
	1782	1798	
Thomas Parke	1777	1823	45 years and 9 months.
James Hutchinson	—	1778	} 15 years. (died.)
	1779	1793	
William Shippen Jr.	1778	1779	} 11 years and 11 mo.
	1791	1802	
John Jones	1780	1791	11 years and 1 mo. (d.)
Benjamin Rush	1783	1813	29 years and 10 mo. (d.)
John Foulke	1784	1794	10 years.
Caspar Wistar	1793	1810	16 years and 5 months.
Philip Syng Physick	1794	1816	22 years and 1 month.
Benjamin Smith Barton	1798	1815	17 years and 10 months.
John Redman Coxe	1802	1807	4 years and 9 months.
Thomas C. James	1807		
John Syng Dorsey	1810	1818	8 years and 6 mo. (d.)
Joseph Hartshorne	—	1821	11 years and 2 months.
John C. Otto	1813		
Samuel Colhoun	1816	1821	5 years.
Joseph Parrish	—	1829	12 years and 8 months.
Thomas T. Hewson	1818		
John Moore	1820	1829	9 years.
William Price	1821	1823	1 year and 10 months.
John Wilson Moore	—	1827	5 years and 3 months.
Samuel Emlen	1823	1828	5 years. (died.)
John Rhea Barton	—		
John K. Mitchell	1827		
Benjamin H. Coates	1828		
Thomas Harris	1829		
Charles Lukens	—		

*A STATEMENT*

*Of the Cases of 28105 Patients, admitted into the Pennsylvania Hospital from the 11th of February 1752, to December 1st 1830.*

The following, although a transcript of the recorded causes of admission, cannot be regarded as an adequate statement of the diseases treated in the Hospital. The mercantile method in which the register of cases has been kept—assigning but one disease, or cause of admission, for each patient,—in order to produce an annual balance sheet, on which the lists of diseases, and of persons, should be numerically equal—is evidently insufficient to a fair exhibit of the practice of the house; inasmuch as one patient may labour under a complication of disease; and, in another, the physician has to cope with several successive maladies; each, perhaps, more formidable than the recorded cause of admission. The physician too, who visits persons desirous of admission, cannot always ascertain, in one short visit, the precise nature of a case then first submitted to his eye; even supposing no obstacles interposed by the ignorance, misapprehension, or wilful concealments of his patient. The absence, therefore, of any disease from the following list, is no evidence that it has not occurred in the practice of the Hospital.

Remaining in the house December 1st, 1830,—Males 66,  
Females 55, total 121.

## DURATION OF CONFINEMENT.

The patients remaining in the house on the first instant, have been confined as follows :

	Males.	Females.	Total.
40 years		1	1
30 to 35 years	3	1	4
25 to 30 "	2	2	4
20 to 25 "	6	1	7
15 to 20 "	6	5	11
10 to 15 "	4	6	10
5 to 10 "	12	11	23
3 to 5 "	4	4	8
2 to 3 "	4	6	10
1 to 2 "	6	4	10
Admitted in 1830	19	14	33
	66	55	121

## AGE OF INSANE PATIENTS.

Of 121 patients remaining in the Hospital, December 1st, 1830, were,—aged

	Males.	Females.	Total.
From 20 to 25 years	6	5	11
25 to 30 "	10	2	12
30 to 35 "	16	6	22
35 to 40 "	7	6	13
40 to 45 "	5	11	16
45 to 50 "	5	4	9
50 to 60 "	9	12	21
60 to 70 "	6	8	14
70 to 80 "	2	1	3
	66	55	121

In 265 consecutive admissions, the age of the parties was as follows :

Aged		Males.	Females.	Total.
15 and under	20 years	7	9	16
20	“ 25 “	24	9	33
25	“ 30 “	29	13	42
30	“ 35 “	41	14	55
35	“ 40 “	14	14	28
40	“ 45 “	17	19	36
45	“ 50 “	13	7	20

*Social relations of persons attacked by Insanity.*

Of 213 males admitted into the Pennsylvania Hospital, there were—

Unmarried	-	-	126
Married	-	-	74
Widowers	-	-	13
			<hr/>
			213
			<hr/>

Of 144 Females, there were—

Unmarried	-	-	45
Married	-	-	71
Widows	-	-	28
			<hr/>
			144
			<hr/>

## MANIA A POTU OR DELIRIUM TREMENS.

Neither of these terms found its way into the Hospital reports prior to the year 1822. The cases of this disease admitted before that period are included among those of Insanity; and although a few of these cases might be recognised under the designations "Drunken madness," and "Lunacy from intemperance," which occasionally appear on the records, yet the general application of the term Insanity to all cases of mental aberration would render it useless to attempt any separation of them from an earlier period.

This disease has been of frequent occurrence in the surgical wards, consequent on accidental injury of the persons of hard drinkers, and death, from this cause, has frequently followed accidents which would scarcely have jeopardized the life of a sober man. Of such cases, however, until lately, no record has been preserved. In the reports of Hospital practice, death has invariably been charged to the cause of admission.

*Cases of Mania a Potu or Delirium Tremens,  
admitted from the year 1822.*

Remaining in the Hospital December 1st 1830, seven women and one infant.

Of the above women six had twins—in four instances the women and both children were discharged in health, but in the other two cases both children died. C. M. was delivered April 10th 1819 of three children, of whom two were still born and the other survived but a short time—the same woman was again admitted in the early part of the year 1821, and became the mother of a single child, which, with herself, was discharged in health.

The following TABLE shows the number of PAY and POOR patients, and the *total number*, admitted into the house in each year from the foundation of the Hospital to the present time ; and also the *average* number of patients *resident* in the institution, during the same period.

Admitted from Feb. 11th 1752, to the end of April	Pay pa- tients.	Poor pa- tients.	Total.	Average popu- lation of the Hospital.
1753	24	40	64	9
