CATALOGUE

DRUGS, PHARMACEUTICAL PREPARATIONS

MEDICINAL WARES

REFERRED TO SPECIALISTS

BURROCK & GIBBS

Chicago

NLM

THE SUBSCRIBERS now offer to Physicians the third edition of their Catalogue, to which a number of new articles has been added: their facilities for importing and manufacturing, enable them to supply all the new preparations as they are presented to the notice of the Profession.

Their Pharmaceutical Preparations are made under their own supervision, in strict accordance with the U. S. Pharmacopœia, and their powders prepared from articles which have been carefully selected.

They would call attention to their glass-stoppered bottles, which, by importing, they are enabled to sell at much reduced rates. Physicians, in ordering, will please mention whether they wish their medicines in such bottles, in cork-stoppered bottles, or in paper.

The skeletons priced on the last page, are of their own importation, from the first anatomical establishment at Paris, and will be found of a superior quality. Anatomical preparations of all kinds will be imported to order.

The urinimeters, so important in the investigation of urinary diseases, are of the most approved London manufacture, accurate and portable.

The Subscribers have constantly on hand a large and general assortment of pure chemical re-agents and chemical wares, catalogues of which will be furnished upon application.

Being also the manufacturers of Osborne's Superfine American Water Colors, they will take pleasure in forwarding Price Currents to all who may desire them.
