

THE NEW YORK PSYCHIATRICAL SOCIETY

March 19th, 1920

Dr. Lawrence Kolb,
Officer-in-charge,
U. S. Public Health Service Hospital,
Waukesha, Wisconsin.

Dear Doctor Kolb:-

Dr. William H. R. Rivers of Cambridge University, England, is now in this country at the invitation of the New York Psychiatric Society, to deliver various lectures on psychiatry and psychology. His lecture tour includes the University of Wisconsin, where he will be on March 22nd to 24th, and I thought it would be nice to have Doctor Rivers stop off at Waukesha at the same time to see your hospital.

I am sure you will be interested in learning his views on the neuroses as he had much to do with influencing the treatment of these cases in England, and directing such treatment in the right channels.

I enclose a biographical sketch for your information. Any courtesies extended to him will be very much appreciated by me.

Sincerely yours,

President.
