Dr. Lawrence Kolb  
6645 - 32 Street, N.W.  
Washington, D.C.

Dear Dr. Kolb:

This Committee has been told that the hospital at Lexington was originally established as a kind of Demonstration Centre for states to guide them in their own hospital plans.

If your records of the early days of Lexington have any information on this, I should appreciate whatever information you may have.

You will be interested in knowing that this Committee, at its hearings in the last few weeks, has had many of your pioneering contributions called to its attention by a large number of the witnesses who have appeared before it.

Sincerely yours,  
*Charles Winick*
