LM

DR. DUBLIN:

I have again carefully gone over your memorandum of December 22nd and the schedule thereto attached. I am more than ever convinced that our Superintendents are not able to have this schedule filled out. They surely are not in a position to do it themselves and I question very much whether they can obtain co-operation of health officers.

It would seem to me that if this information is desirable we had better communicate with health officers directly. Judging from the results which I obtained two years ago in the completion of the questionnaire which I sent out at that time, health officers are very responsive and we can count upon help from most of them. With proper follow-up letters we ought to be able to have practically all of them send us the desired data.

Will you rearrange the schedule so that it may be sent with a letter to health officials.

[Signature]
Third Vice-President.
