## UNINSURED ADULTS BY COUNTY

Mississippi County-Level 2019 Data

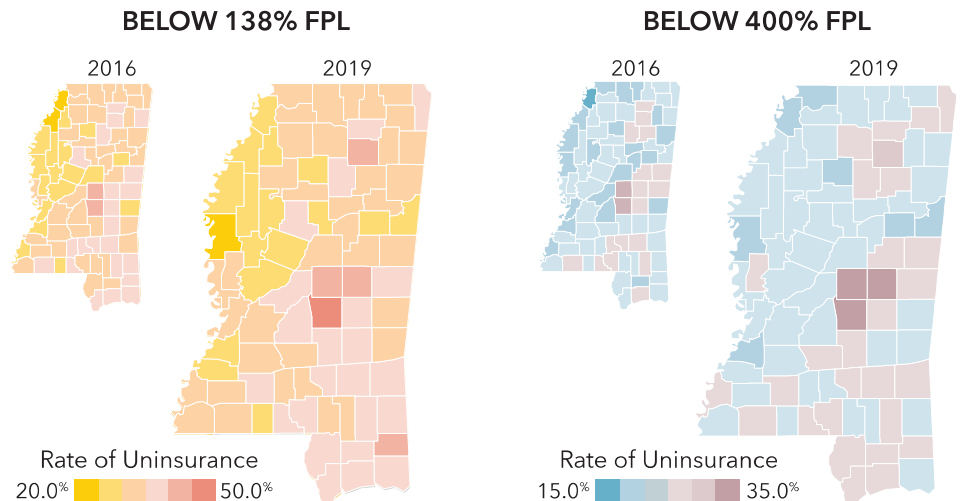

**ALMOST ONE-FIFTH OF ADULTS IN THE STATE, BELOW 400% FPL, AGES 18-64, ARE UNINSURED.**

This fact sheet provides the number and percentage of adults ages 18 - 64 without health insurance at the county level in Mississippi and compares rates for years 2016 and 2019, the most recent data.

Under the Affordable Care Act, Adults with household incomes below 138% of the Federal Poverty Level (FPL) would qualify for expanded Medicaid coverage currently not elected by the state. Adults from households with incomes below 400% FPL qualify for federal support (subsidies) to buy health insurance through a Health Insurance Exchange. Data is from the 2019 Small Area Health Insurance Estimates (SAHIE) calculated by the United States Census Bureau.

**COMPARED TO U.S. ADULTS, ADULTS IN MISSISSIPPI HAVE HIGHER RATES OF UNINSURANCE AND LOWER PRIVATE INSURANCE RATES.**

## RATES OF UNINSURANCE INCREASED FROM 2016 TO 2019

State-level rates of uninsurance among Mississippi adults with incomes at or below 400% FPL increased from 2016 to 2019 but continued to fall for adults below 138% FPL (sidebar page 1). During the same period, 18 counties saw an increase in the number of uninsured adults at or below 138% FPL while the number of adults at or below 400% FPL rose in 43 counties. All Mississippi counties except for Tunica are estimated to have rates of adult uninsurance higher than the national average for households at 400% FPL while every county experienced higher than national rates for adults at 138% FPL (see sidebar).

After key policies in the Affordable Care Act went into effect, uninsurance rates decreased steadily state-wide from 2013. However, some counties have seen recent increases in the number of uninsured adults even though many are eligible for subsidies to buy private insurance from the federal Health Insurance Marketplace.

Overall, gains in insurance coverage for Mississippi adults since 2013 levels have been maintained at the county level. The number of adults without health coverage dropped by 30% in households with incomes below 400% FPL and by almost 36% in households at or below 138% FPL. Adults at the lowest income category have seen steady year after year declines in uninsurance with an estimated 3,500 adults gaining coverage between 2018 and 2019. The statewide trend for households (<400%FPL) has reversed since 2016 (see sidebar pg.1) with an increase of 7,900 more uninsured.
